Welcome

Welcome to the new Tardigrad Newsletter! We offer to catch-up on the key moments from the quarter, that we will be pleased to share with you.

Further public announcements, news will be developed and shared via LinkedIn, our blog on web and Instagram. Follow the updates.

Main benefits of Wilpak Thermal Covers for supply chain

World leading thermal protection innovations.

Collaboration with Wilpak Group International gives us the opportunity to broaden the variety of services and products. When it comes to thermal pallet covers, you need a reliable product made from a strong, thermal insulation material. Insulcap® pallet covers provide protection against temperature and weather extremes, as well as mechanical damages such as scuffing.

What are the main features:

- These thermal barrier systems enclose the palletised products to provide an enclosed thermal environment that passively manages product temperature during storage and transport.
- **InsulCap®** can be constructed from a range of thermal barrier materials, innovated by Wilpak Group International.

- **InsulPlatinum®** barrier is a heavy-duty large air cylinder material which offers maximum protection for temperature sensitive goods, while our **InsulPrime®** barrier is a general-purpose material at a budget price.
- Wide range of standard and custom dimensions.

- Typical dimensions are based on the size of existing palletised loads.

- Environment-friendly new products – **InsulRecycle®** is the thermal barrier innovation of the future, being a high performing and **recyclable** solution that is available now.

Thermal covers are available in our warehouse, order now prague@tardigrad.com

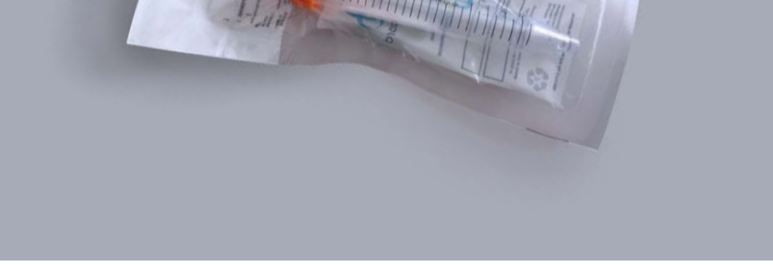

The unique on the world's market – new product from Bio Bottle

Introducing a new product from our partner Bio-Bottle - 1NZ bio-pouch, smallest of the bio-pouch range. Its unique features make it the ideal solution for organisations involved in research laboratories, medical facilities and other sectors that deal with biological specimens. The 1NZ bio-pouch provides a liquid tight flexible secondary package for the shipment of biological samples.

Withstanding the differential pressure of 95 kPa the 1NZ bio-pouch is made with a custom film structure that features a strong adhesive closure and continuous seal. Perfect for small tubes or vials.

Awaiting CPHI 2023 in Barcelona

Event CPHI 2023, 24–26 October 2023
Location Fira Barcelona Gran Via, Spain

As every year, we anticipate the global event – CPHI 2023, the world's largest pharmaceutical exhibition. Many packaging and contract service suppliers, distributors and buyers will attend the expo to research the newest trends in ingredients, machinery, equipment and technology. CPHI 2023 has developed itself into a top B2B trend-and-order platform that binds professionals and their customers together.

For the Tardigrad team is a chance to meet new customers, to deepen relations with our clients, suppliers and agents. All this and the possibility to explore the coastal city Barcelona with its marvelous architecture will make up for a one-of-a-kind business experience. See you soon at Fira Barcelona Gran Via, stand 3F10.

To book a meeting with our team e-mail to prague@tardigrad.com

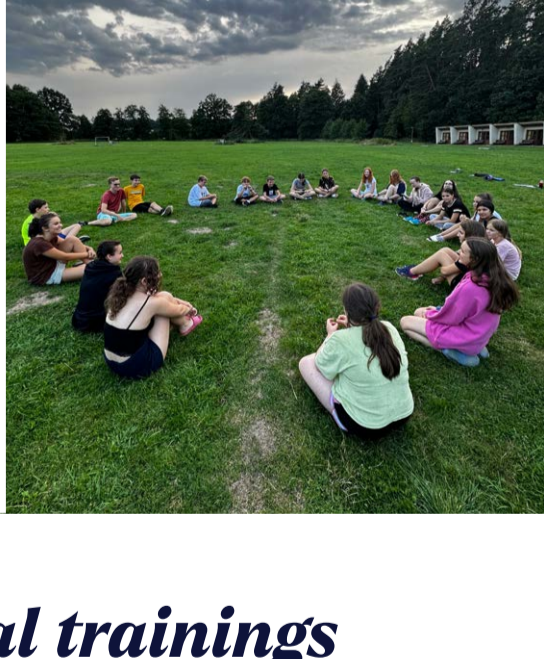

Partnership with the fund Radost dětem

It's a special honor and pleasure to be a partner of the fund "Radost dětem". The goal of the organization is to help children across the Czech Republic, especially children with serious illness or from orphan homes. It's not only about social, medical or financial help – it's about bringing some joy in young lives. This year we had a wonderful opportunity to support summer camp staying for three children from Tuchlov orphan home. Children had possibility to spend good time in nature, to participate in camp activities, to find new friends. This camp is focusing

on Talents, so children could sing, do theater and to stage a show on the final day. This was a good time full of emotions and new experiences. Tardigrad team is happy about participating in small mercies.

The best way to make children good is to make them happy.

If you would like to help the fund too – please kindly contact prague@tardigrad.com

Great opportunity – educational trainings

We are happy to share our experience with you. Our specialists organize educational trainings: Good Distribution Practice and Cold Chain management courses. Based on customers reviews we can assume that courses are useful and interesting.

Successful attendees will receive the training certificate and a glass of Champagne. Dates of the courses are agreed individually.

It's not only lectures and educational resources, but active interaction and workshops. You will have a chance to know both theory and practical advise and discuss all

Educational training schedule will be announced on our web page and linkedin. To organize and book a specific tailor-made educational course – contact prague@tardigrad.com

Increasing the audience – welcome Tardigrad Group to Instagram

In the previous publication of the newsletter we've talked about Tardigrad brand identity change, new design and about our growth and development. So we do not stop! Modern life dictates new terms and we're so excited to announce that Tardigrad Group now has an Instagram account! We will publish interesting information, some photos from our daily routine, announce new events and maybe some funny stories ;) Feel free to follow us there on Instagram and drop a comment to say hello!

@TARDIGRAD_GROUP

Thank you for your attention.

Tardigrad Team

We hope you were not bored with much information. See you soon in the next Newsletter issues.
